Controlled by DMX	**wireless. (5 modes: Ledc-4-5-9-10 channels)**
	Controlled by a wireless IR remote control

Overview

Battery operated LED floodlight, based on 6 x 10Watt RGBWA LEDs to avoid unwanted color shadows.

Projection angle = 25°.

The projection angle can be adjusted to 25° (from vertical to horizontal).

The perfect solution for many applications: parties, special events, mobile DJ's, ...

+/-4 hours of use in "fading" mode on a fully charged battery or +/-10 hours in ECONOMIC MODE (reduced brightness).

Each projector is equipped with a wireless transceiver module that is 100% compatible with the W-DMX G4 protocol from Wireless Solution Sweden.

The projector can still be used with an empty battery: just plug it into the mains, using the battery charger!

Very smooth RGBWA color changes.

The battery charger recharges the battery while the projector is running on AC power.

The projector comes with a filter for a wider beam angle (40°).
