Manuals, compatible accessories and updates — scan the code or click the address.

Overview

This barn door controls the beam pattern of the projector and prevents annoying glare.

Optimal beam control due to the 8-flap design.

Simply attaches to the projector with 4 stainless steel bolts.

The barndoor is mainly used for indoor applications, for a fixed outdoor installation it is preferable to choose the "BT-CHROMA 800 - Glare Shield" (code: B05548).

Can be used with the filter holder (magnetic).
