1350,00 € inc. VAT

3200 W vertical fog machine - 35 RGB LEDs

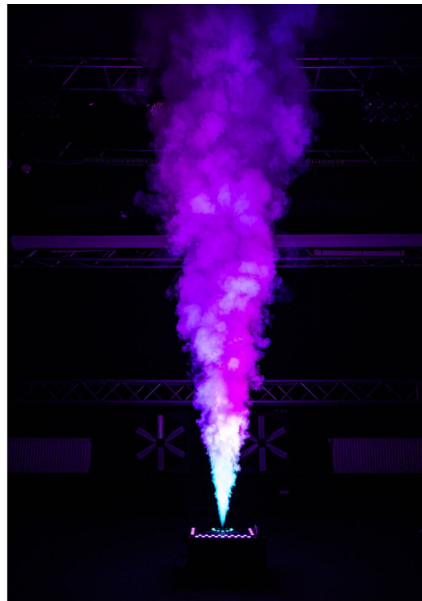

- This high-performance vertical smoke generator creates explosive columns over 12 m high.
- An economical and practical alternative to the often costly and complex effects of CO2 jets.
- Spectacular lighting thanks to 2 independent LED rings incorporating 35 RGB LEDs (total power: 315 W).
- Powerful, fast-flowing smoke thanks to a 3200 W heating element combined with a high-pressure compressor.
- Versatile operation: creates ascending or descending columns ("OMEGA BRACKET SMALL" brackets required for inversion).
- Flexible control via 5 or 11 DMX channels.
- Wireless DMX compatibility: simply connect the optional WTR-DMX dongle.
- Easy mounting with optional omega brackets.
- ECO mode included: reduces power consumption to 1600 W for optimized operation.
- Recommendation: use a "fast-dissipating" smoke liquid for perfect effects.
- Advanced connectivity: powerCON TRUE1, XLR 3-pin and 5-pin.

Caractéristiques

Brand	Briteq
Smoke jet	12 m
Controllable colours	RGB
Protocole	DMX, Wireless DMX
