3500 W Vertical Fog Machine - 35 RGB LEDs

SKU: B04750

Categories: [Geyser machines](#)

EAN13 : 5420025647502

brand Briteq

- This extremely powerful vertical smoke generator produces explosive smoke columns of over 12 m high.
- It is the ideal alternative to expensive and difficult to use CO2 jet effects!
- The smoke column is illuminated by two independently controllable LED rings (35 RGB LEDs with a total power of 315W).
- The 3200W heating element, combined with the high pressure compressor, ensures a very fast succession of powerful smoke jets.
- Can also be operated in reverse to produce powerful downdraft smoke columns.
- Controllable via 5 or 11 DMX channels.
- Prepared for wireless DMX: just connect the optional DONGLE WTR-DMX.
- Optional omega brackets are available for mounting in the structure.
- Also works in ECO mode: power consumption of only 1600W.
- Recommended smoke fluid: "Fast dissipating" smoke fluid.
- Connections: PowerCON TRUE1 + XLR 3pin + XLR 5pin.
