Elegant fanless 4-cell 3000 K white "HI-CRI" spotlight with "**escape lighting function**"

- This elegant white 4-cell spotlight has some very interesting features, making it particularly suitable for lighting auditoriums, concert halls, art galleries, museums and much more.
- It features an **evacuation lighting function**: in the event of a power failure, the spotlight continues to operate for at least 2 hours thanks to the optional internal battery (with built-in charger).
- It's also the ideal tool for rental companies: solid, battery-powered lighting when dismantling equipment after a show, or automatic lighting in the event of a power failure.
- The sturdy die-cast aluminum chassis ensures natural convection cooling: no fan, so **totally silent**.
- 4 cells, each with COB 3000K and high CRI >90
- Thanks to its high efficiency, it combines high light output with low power consumption!
- Standard 45° reflectors can be easily replaced by optional reflectors with different beam angles: 24°, 60°.
- Cells can be controlled in different configurations: 4 sets, 4 separate or 2 x 2 cells
- Wired DMX/RDM or wireless DMX dongle for easy remote control.
- Can also be operated independently (on/off switch).
- Standard powerCON TRUE1 / XLR 3-pin connections can be quickly converted to XLR 5-pin or fixed-wire connections.
- Power consumption: 160 W
- Weight: 5.6 kg
- Dimensions: 42.3 x 11.2 x 17.9 cm

Caractéristiques

Brand	Briteq
Controllable colours	Warm white
Protection class	IP20
Lux	620 (45°) at 5 m
Protocole	DMX, RDM, Wireless DMX
LED type	COB
