Compatible with	BTX-SKYRAN
Color	black
Net weight	0.56 kg

Overview

A more understated look for corporate events.

The BTX-SKYRAN is an impressive multi-effect fixture built for concert stages and TV sets, with flower-shaped lenses and white and RGB pixel lines that are clearly visible to the eye. That striking look, perfect on a show, isn't always what a corporate event calls for, where a more understated presence matters more. The BTX-SKYRAN FRONT COVER answers exactly that need: it masks the white and RGB pixel lines behind a matte black cover, for a noticeably more discreet appearance.

The effects stay, just softened.

The cover doesn't disable anything: the pixel lines remain visible and fully functional, just toned down and less glaring to the eye. The SKYRAN keeps its full range of effects (blinder, strobe, RGB pixel mapping) while blending naturally into a more low-key setting, without the fixture standing out visually.

Instant installation, no tools.

The cover fits straight onto the front of the BTX-SKYRAN, no tools and no disassembly required. A whole rig can switch from a spectacular look to a corporate one in minutes, depending on the event.

Key features:

Dedicated front cover for the BTX-SKYRAN

Masks white and RGB pixel lines behind a matte black cover

Effects stay fully active, just softened and less glaring

Tool-free installation
