Storage	**1 side pocket for accessories (microphone included)**
Protection	**against dust, impact and light splashing (not rainproof)**

Overview

Protect your RACER80 Evo without ever taking it out of its cover.

Protect your RACER80 Evo with the COV-CR80A/Racer80, a custom-fit protective cover made from water-repellent 600D Oxford fabric on the outer panels, backed by a composite foam layer and an inner nylon lining for reinforced thickness that shields the speaker from knocks and scuffs day to day, on the job and in storage. Its front panel, made of a fixed, flap-free acoustic fabric, lets sound through without alteration: the speaker can be used straight through the cover, never exposed to dust or impact during the event.

Full access to every function, made for life on the road.

A dedicated flap gives access to the carrying handle, so the protected speaker can be moved around without removing the cover. A side pocket holds all the accessories, including the microphone, since the RACER80 Evo has no built-in microphone compartment. At the back, a second flap clears the entire rear panel, so the mixer settings can be adjusted without ever exposing the rest of the speaker.

Key features:

Custom-fit cover for the RACER80 Evo

Fixed, flap-free acoustic front panel: usable without removing the cover
