- The perfect solution to many DMX cable problems. This compact DMX splitter divides each DMX channel into 2 distinct lines that do not interfere with each other. Problems on one line will not affect the other line
- Maximum safety, thanks to complete galvanic isolation between all DMX inputs/outputs
- 100% RDM compatible for bi-directional DMX communication
- The booster function makes your DMX installation more reliable and flexible to set up
- Specially designed for professionals:
 - Small size : can be hidden easily
 - Very robust construction: perfect for rental
 - Can be equipped with any standard hook with M10 thread: easy installation in the structure
- Suitable for use with ^{HILEC®} COMBI cables (current + DMX combination)!
- Connections:
 - 1 input: 5-pin DMX (+ DMX gateway) and ^{Seetronic®} 16A connector compatible with PowerCON TRUE1
 - 2 outputs, each with : 5-pin DMX connector + 16 A ^{Seetronic®} PowerCON TRUE1 compatible
- There is also a model (DS123-RDM) equipped with 16 A powerCON and 3-pin XLR connectors
- Power and signal presence indicators
- Internal power supply 100-240 Vac
