

## DSP2-LED

Triac dimmer/switch pack: 2 DMX channels for 100-240Vac LED lamps and other small loads

Référence: B04662

**45,90 € inc. VAT**

- This 2-channel mosfet dimmer works perfectly with small loads like dimmable LED lamps and small halogen lamps.
- Excellent 100-240Vac dimmer for dimmable LED lamps and LED drivers with loads up to only 2watt!
- 2 dimmer modes (Forward- / Reverse-phase) for greater lamp compatibility!
- The minimum brightness of the dimmer from 1% to 40% can be programmed to avoid flickering.
- Different modes of operation:
  - **DMXcontrol:** 1 or 2 DMX channels with remote RDM addressing capability
  - **Stand-alone dimmer:** with up to 8 dimmer presets, no DMX required.
  - **Autonomouslydynamics:** 4 different modes with brightness and speed control
- Small dimensions for easy "blind" installation in cabinets or false ceilings!
- Maximum output: 2x 1A (2x 240W / 240Vac or 2x 120W / 120Vac)
- 

**Remark:**

*To be used only with dimmable LED lamps, non-dimmable LED lamps may cause technical failure.*

## Caractéristiques

<b>Brand</b>	JB Systems
--------------	------------

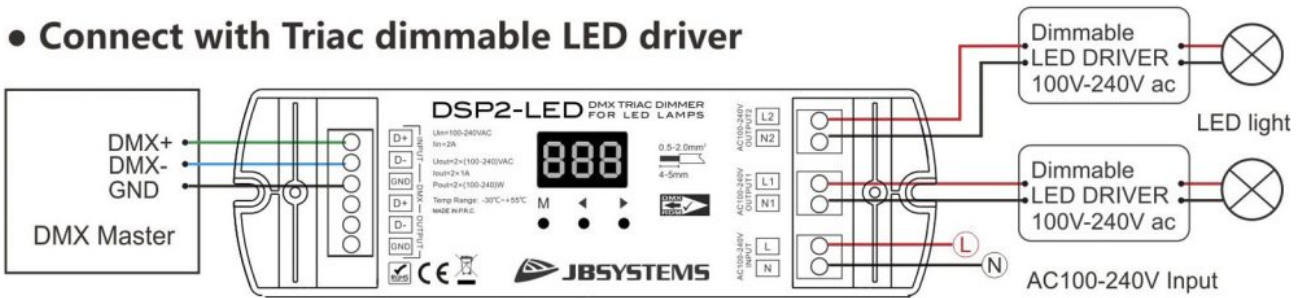

# Galerie photos

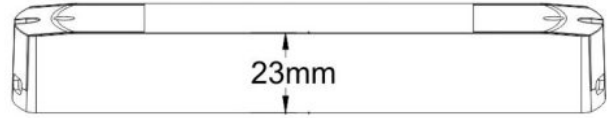

• Connect with dimmable LED light

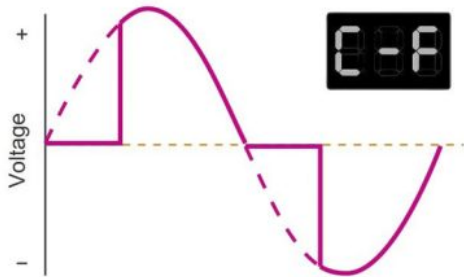

• Connect with Triac dimmable LED driver

## DIMENSIONS

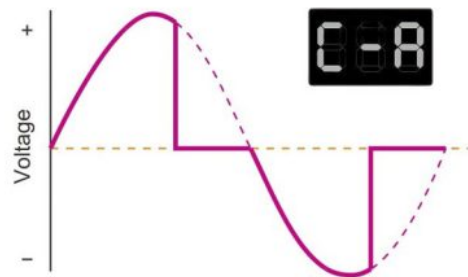

## FORWARD-PHASE CONTROL

For Incandescent lamps (better energy efficiency)  
Lamps with magnetic transformers  
Some LED lamps / drivers

## REVERSE-PHASE CONTROL

Lamps with electronic transformers  
Extremely silent operation  
Smoother dimming down to 5%  
In general better results with LED lamps
