

DYNABARREL

Innovative and compact rotating mirror LED effect

Référence: B04187

- Innovative and compact rotating mirror LED effect.
- The new drum design makes this projector even more dynamic than ever.
- The 10W RGBW LED guarantees high light output combined with low power consumption.
- Equipped with excellent built-in programs for fabulous light effects in constant motion.
- This drum effect can be used and controlled in many different ways:
 - **Ready to use:** stand-alone operation without any controller (optional CA-8 remote control available)
 - **Master/slave operation:** for pleasant synchronized light effects where several devices are linked together.
 - **1-channel DMX control:** various color choices for static or slow-moving beams or simple selection of a sound-controlled light show.
 - **9-channel DMX control:** select automatic functions as in 1-channel mode, or take control of color, pan and tilt, dimmer and strobe.
- With the IEC power input/output connectors, you can easily link multiple projectors. (COMBI cables available as an option)
- 4-character display for easy setting.

Caractéristiques

Brand	JB Systems
