Technical specifications

- Dimensions : 390 x 390 mm
- Material : Aluminium
- Sleeves:
- 4 tapered half-sleeves
- 4 Keys
- 4 Pins

Overview

EMQUA39-B1 baseplate: a stable foundation for QUATRO39 structures

The EMQUA39-B1 baseplate is a 400 x 400 mm aluminum baseplate designed to provide a stable, secure foundation for QUATRO39 structures (390x390 mm). An essential element for freestanding installations, it can be used to create vertical structures, gantries, lifting towers and architectural configurations with or without overhead attachment points. Manufactured from high-strength aluminum, the EMQUA39-B1 base ensures optimum load distribution on the ground, while offering great stability even for structures of considerable height. Its black finish ensures discreet visual integration into all your professional projects. Supplied complete with 4 conical half-sleeves, 4 wedges and 4 pins, it's ready to use as soon as you receive it.

Certified European manufacturing.

Each EMQUA39-B1 base is manufactured in Europe from high-strength aluminum in accordance with ISO DIN 4113 and TÜV standards. This certification guarantees maximum reliability and safety for your permanent or temporary installations. The quality of the materials and the rigorous quality control applied to every component ensure long-lasting performance and optimal resistance to the mechanical stresses of professional structures. The EMQUA39-B1 base meets the requirements of professional service providers, installers, and engineering firms seeking reliable solutions for secure ground-mounted structures.

Complete, ready-to-assemble system.

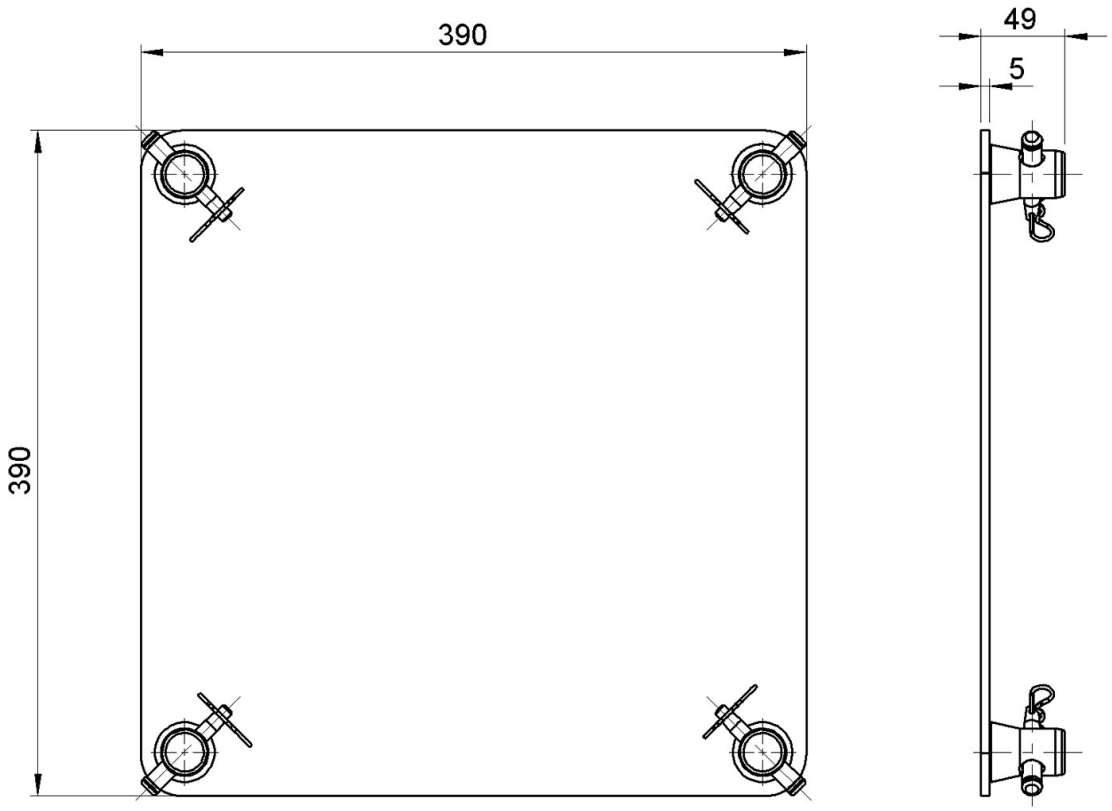

The EMQUA39-B1 base comes with a complete mounting kit: 4 conical half-sleeves allow for direct connection to QUATRO39 beams, while the 4 wedges and 4 pins ensure a solid and secure fastening. This mounting system simplifies assembly and ensures precise alignment of vertical structures. Ideal for event contractors, the EMQUA39-B1 base reduces on-site installation time while ensuring impeccable stability.

Compatible with the QUATRO39 series and Contestage accessories.

The EMQUA39-B1 base is specifically designed for the QUATRO39 series. Its 400 x 400 mm surface provides a stable foundation and can be weighted as needed for your project to ensure optimal stability for your structures.Technical specifications:

Manufactured to ISO DIN 4113 and TÜV standards.
