

## **Flexiled Blue / 5M**

LED ribbon, blue color Length 5m 24 V

**Référence:** B05347

- Flexible plastic garlands containing blue LEDs, used to change the colors of walls and ceilings in all types of festive places: bars, discos, taverns, stores, etc.
- Several applications are possible: fix the LED strips in furniture, behind translucent plexi panels to color surfaces, walls and ceilings.
- This flexible version of normal LED strips has only advantages:
  - - The strip, 5 meters long, can easily be cut to size on the markers (present every 16.5 cm);
  - - It can be easily bent to follow the curves of any surface;
  - - Thanks to its PU coating, it meets the IP65 standard;
  - - It has a double silicone coating, which allows for easy installation on any surface; it can be attached with small nails, staples or double-sided tape.
- This version can be used with our "LED PSU 50W/24V DC" to provide a cost-effective solution;
- This version can be used with our full range of 100% compatible LED Managers when dimming is important.
- The light output is impressive (up to 3 times more than the RGB version) thanks to the LEDs of model 5050.
- Very good aesthetics, 'slim line' type.
- The technology used guarantees a very long service life for LEDs!
