ANTARI Hazer professional

SKU: B04817

Categories: [Fog machines](#)

brand Antari

We are proud to introduce the HZ-500 Antari, the latest fog machine in the entertainment industry. This unprecedented masterpiece, created by Antari's R&D team, is the result of immense experience in fog machine design and years of hard work. As a result, the performance of the HZ-500 is second to none and better than any other fog machine on the scene. The haze is perfect for use with laser beams and LED lighting, and creates the best atmospheric effects for any event. The HZ-500 is certainly the best choice for show setters, performers and venues where silence is extremely important. Last but not least, the HZ-500's extraordinarily low consumption of fog fluid makes it the most energy efficient and environmentally friendly.

Key Features:

- VERY LOW SOUND LEVEL, less than 70 dB at a distance of 10 cm: ideal for all rooms where silence is extremely important!
- Dry Mist: The HZ-500 produces a very dry mist, which does not generate additional moisture.
- Extremely small particles: the HZ-500 produces incredibly tiny particles. This way, the mist can be mixed with the air more quickly. In addition, the mist lasts longer.
- A metal net and a filter prevent clogging problems. The metal net and the filter can be cleaned (easily detachable and cleanable with water).
- Very low misting fluid consumption: only one liter required for 20 hours of operation!
- A compact carrying case is provided making the unit stronger, more durable and easier to transport.
- Integrated DMX for complete control at any time and from anywhere.

INFORMATIONS COMPLÉMENTAIRES

Brand	Antari
Smoke emission	57 m ³ /min
Machine	Hazer
Protocole	DMX
