

LED MEGA BEAM MK3

This waterproof LED floodlight (RGBW) with wash effect

SKU: B04395

Categories: [Architectural spotlights](#)

EAN13 : 5420025643955

brand Briteq

- This LED floodlight (RGBW) with wash effect brings the light power of LEDs to a level never reached before: it is even 5 times higher than that of our LED POWER BEAM! (RGBW@2m: 18.300 lux)
- The device is based on 48 high power LEDs (3W): 12 red + 12 green + 12 blue + 12 white.
- The white LEDs soften the colors so that you get nice pastel colors!
- The fact of using LED technology allows to make important energy savings (and money!) if we make the comparison with devices functioning with halogen lamps: only 200 watts of consumption and no more need for powerful 'dimmers packs'!
- The solid cast aluminum housing is waterproof (IP66), which should make this device your first choice for lighting all kinds of buildings such as hotels, stores, discos, public gardens and amusement parks, fairs, theaters, medium to large stages, etc.
- The 400 Hz scanning speed of the LEDs also makes them an ideal choice for TV studios: no interference with TV cameras!
- Totally silent: the projector is cooled by natural air convection; the usually noisy fans are no longer necessary!
- Thanks to the double suspension bracket, the device can also be used as a floor lamp.
- LED MEGA BEAM works in standalone mode or in different DMX modes (3, 4, 5, 6 and 11 channels), including RGB color mixing, color affecting macros, custom programs, RGB calibration, strobe mode, dimmer, ID addresses, etc.
- Liquid crystal display organized in menus and with password protection.
- **NOTE: This product has an IP65 rating for outdoor installation under normal conditions (not exposed to sea water).**
