

LEDCON-02 Mk2

Référence: B04660

109,00 € inc. VAT

Small LED controller, preprogrammed

- The LEDCON-02 MK2 is a remote control for LED floodlights with a very high flexibility.
- The LEDCON-02 MK2 has a built-in light modulator (switchable to 4 or 8 channels) for LED floodlights, so you can control LED floodlights in exactly the same way as you used to control older PAR models with halogen bulbs via a traditional light modulator. But we can still do much more than that ...
- Remote control for:
 - The LED MANAGER series
 - JB Systems LED Floodlights
 - All other fixtures that have a DMX compatible mode...
- The LEDCON-02 MK2 has different operating modes:
 - 4 or 8 channel light modulator with built-in music controlled chaser effects.
 - Fixed colors mode: immediate access to the 9 pre-programmed colors with adjustable transition time
 - Static chase mode: 12 different color scrolls with manual speed control
 - Sound chase mode: 12 different color scrolls with triggering via the audio signal
 - Spectrum mix : 32 different spectrum mix colors creating beautiful transitions
- Speed and triggering by audio signal adjustable via sliders
- Fully automatic DMX addressing function to control up to 120 LED fixtures
- Black out' and 'full on' functions
