

## LEDCON-XL

209,00 € inc. VAT

DMX programmable controller

SKU: B04661

Categories: [DMX console](#)

EAN13 : 5420025646611

brand JB Systems

- This LEDCON-XL controller is probably THE controller you've always wanted.
  - Pre-programmed colors, fades and chases for almost all types of LED projectors.
  - 8 additional dimmers to control your light shows, smoke machines, lyres with 4/5 MSL mode, etc.
  - DMX input with merge function to connect any additional controller on the same DMX line
  - Standard 19" rack format ideal for mounting the unit in our 3U Controller Case
  - Prepared for wireless DMX: just connect a DONGLE WTR-DMX! (optional, Briteq® code B04645)
- The control section of the projector is a more powerful version of our famous LEDCON-02 Mk2 :
  - 4 or 8 channel LED light modulator with integrated chases, controlled by music and speed.
  - For each of the 4 or 8 units, you can select the DMX configuration of the fixture used (RGB, RGB + white, RGB + white + amber, etc.). Therefore, the unit will be compatible with most of the LED projectors available on the market!
  - Each of the units can be activated/deactivated, if necessary. (blackout for some projectors).
  - Additional UV button for using, for example, 6-in-1 LED floodlight which includes UV LED.
  - Separate control for strobe and dimmer.
  - Fixed color mode: Instant access to 9 pre-programmed colors with variable dimming time.
  - Static chase mode: 12 different colored chases with manual speed control.
  - Sound-activated chase mode: 12 different colored chases with audio activation via the audio input or the built-in microphone.
  - Spectral mixing: 32 different spectral mixing colors, including color fades.
- The additional dimmer section is comparable to our SCENEMASTER SCM-1 :
  - It is then possible to control, via the same DMX line, additional projectors, light shows, smoke machines, etc.
  - Perfectly suited to control lanterns equipped with our SMART-DMX mode (formerly known as DMX-MSL mode)
  - It is possible to use the dimmers as 8 individual DMX channels or to create 8 scenes (dimmer group)
