

MINI DMX-SPLITTER

Mini DMX splitter 1in/2out

Référence: B04630

43,90 € inc. VAT

- Here is a perfect solution to avoid problems caused by DMX sets: this DMX mini-splitter divides any DMX chain into two separate lines that will not interfere with each other, so problems on one line will have no influence on the other line!
- The booster function allows your DMX installation to be both more reliable and more flexible, regardless of its configuration.
- This splitter can also be used to configure SMART-DMX mode (formerly known as DMX-MSL mode).
- Because of its small size, the device can be added or even hidden anywhere!
- Presence of one DMX input + 2 DMX outputs, each equipped with 3-pin connectors.
- Small power supply transformer delivering 9 V DC power is included

Caractéristiques

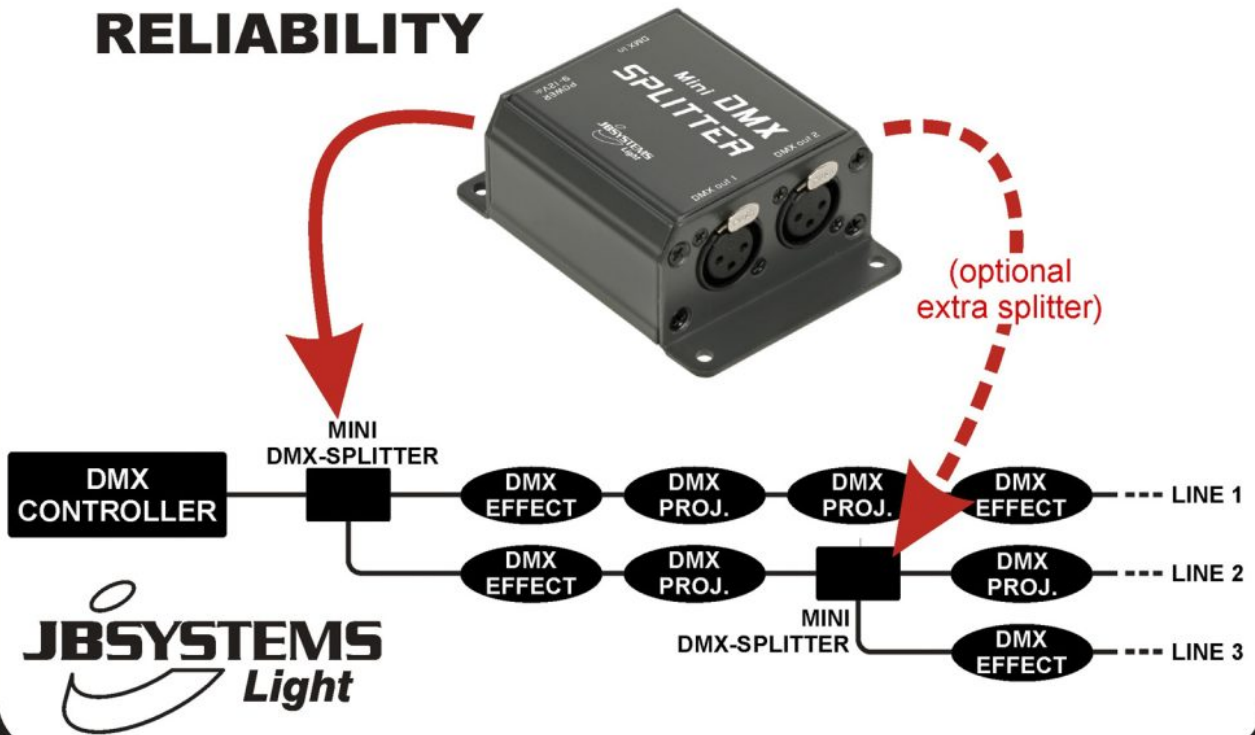

Brand	JB Systems
