Complete mixing console

The many available inputs allow you to connect a microphone or keyboard to channel 1, a guitar or microphone to channel 2, and an auxiliary line source or Bluetooth® input to channel 3.

Feel the stereo with Bluetooth® TWS

Send music from your cell phone to the Bluetooth® module on the MOJO500LineTWS.

Thanks to True Wireless Stereo technology, it transmits the audio signal to a second MOJO, so you can enjoy stereo mode!

Wide dispersion

The controlled orientation of the column's 6 drivers gives a dispersion of 120° horizontally and 20° vertically.

This asymmetrical diffusion avoids reflections, optimizing rendering even in difficult configurations.
