Interior protection	**shaped foam**
Dimensions	**80 × 60 × 56 cm (L × W × H), 70 cm total height (including casters)**
Total weight	**38.5 kg**

Overview

Two fixtures and their accessories, one flight case.

The MOVING HEAD CASE 4 Mk2 is sized to hold two full BTX-CIRRUS 3 units without having to sort through or squeeze in their accessories. Compatible with every generation of the BTX-CIRRUS range, it works just as well with a fresh rig as with older stock. A separate dedicated compartment holds truss mounting hooks, cables and all the small parts that travel with the fixtures, so the whole kit leaves in one flight case rather than spread across several.

Built for the road.

9 mm plywood construction with a durable black HEXA finish, reinforced corners to absorb repeated handling knocks. This flight case delivers optimal protection thanks to its interior foam, shaped specifically for the fixtures, cushioning the contents on every trip.

Handling and transport.

Two recessed folding handles on each short side, and two more on each long side: four grip points in total, for flexible one- or two-person carrying depending on the setup. Four 100 mm soft rubber swivel casters with self-aligning wheels, two with brakes for better standstill stability. Secure closure with heavy-duty butterfly latches. A recessed panel on the lid is built for labelling, handy for telling this flight case apart from others of the same size in a stack.

A format built to fit existing logistics.

Standard truck-pack dimensions, 80 × 60 × 56 cm (L × W × H), 70 cm tall overall including casters. This flight case stacks with other cases of the same format, saving space both in transit and in storage.

Key features:

Stackable flight case, compatible with every BTX-CIRRUS generation and their accessories

Dedicated compartment for mounting hooks, cables and small parts
