Type	**multipurpose flight case**
Internal layouts	**4 compartments 265 × 265 mm / 3 compartments (1 × 552 × 265 mm + 2 × 265 × 265 mm) / 2 compartments 552 × 265 mm / 1 compartment 552 × 552 mm**
Material	**9 mm plywood, black HEXA finish**
Corners	**reinforced, rounded**
Handles	**2 recessed folding**
Casters	**4 × 100 mm soft rubber swivel, self-aligning, 2 with brakes**
Latches	**butterfly latches**
Interior protection	**foam lining**
Dimensions	**60 × 60 cm footprint, 60 cm tall (including casters)**
Total weight	**28 kg**

Overview

Storage that adapts to the load, not the other way around.

The MULTIPURPOSE CASE 2 solves a recurring problem on the road: small gear (cables, hooks, accessories, small fixtures) with no dedicated flight case, or crammed into one built for something else. Three removable dividers let the interior of this flight case reconfigure on the fly: four 265 × 265 mm compartments for a mix of small items, three compartments in a mixed layout, two larger 552 × 265 mm compartments, or a single 552 × 552 mm space for loose gear.

Built for the road.

9 mm plywood construction with a black HEXA finish, reinforced rounded corners to absorb repeated handling knocks. This flight case delivers full protection for its contents thanks to its foam-lined interior, cushioning gear regardless of which divider layout is in use.

Handling and transport.

Two recessed folding handles, one on each side, for two-person carrying when needed. Four 100 mm soft rubber swivel casters with self-aligning wheels, two with brakes for secure standstill. Heavy-duty recessed butterfly latches keep the contents secure in transit. A recessed panel on the lid allows direct tour or content labelling, handy for telling this flight case apart from others of the same size in a stack.

A format built to fit existing logistics.

Standard truck-pack footprint, 60 × 60 cm on the ground (60 cm tall including casters): this flight case stacks and stores alongside other cases of the same size with no wasted space.

Key features:

Multipurpose flight case, modular interior (3 removable dividers, up to 4 compartments)

9 mm plywood, black HEXA finish, reinforced corners for added protection

Foam-lined interior

2 recessed folding handles

4 × 100 mm swivel casters, 2 with brakes

Heavy-duty recessed butterfly latches

Recessed panel for tour labelling

Standard truck-pack dimensions (60 × 60 cm)
