Overview

A compact wall-mounted tablet compatible with all applications.

The Nexus 5 is a 5.5-inch Android touchscreen control panel with an elegant metal housing, designed for flush-mount installation in spaces where compactness is a priority. Powered by PoE or 12 V DC via a single network cable, it can be installed without the need for AC wiring. Its 720×1280 capacitive touchscreen with 300 nits of brightness ensures clear readability in virtually all lighting conditions.

An open Android device, suitable for all uses.

Running Android 14 and powered by its RK3576 octa-core processor, the Nexus 5 provides access to the Play Store and all available apps: music streaming with Spotify, web radio, or playback of local files; lighting control with Sweetlight or similar apps; home automation; room management... Every installation becomes a customized experience, tailored to the site's actual needs.

The Ami control panel, in a compact format.

With AmiControl preinstalled, the Nexus 5 instantly becomes the wall-mounted control panel for your Ami system. The installer designs the interface to match the customer's branding—logo, wallpaper, and layout of faders and buttons—for a fully personalized user experience. Dual-band Wi-Fi 6, Bluetooth 5.4, RS485, and Ethernet round out the connectivity options.
