

PD-63A Mk2 / GER-NL

This three-phase power distributor is designed to improve safety for both fixed and mobile and/or rental installations.

Référence: B04640

790,00 € inc. VAT

- This three-phase power distributor is designed to improve safety for both fixed and mobile and/or rental installations.
- Output connections:
 - 2x CEE socket (3P+N+E) 32A (3x 32A with 5 conductors)
 - C32 (32A - 3P+N) automatic circuit breaker with 4 contacts per 32A output
 - 3x 16 A output sockets with earth connection (1 socket per phase)
 - C16 (16A - 1P+N) automatic circuit breaker with 2 contacts per 16A output
- Input connection:
 - 1.5 m long input power cable (3x 63A with 5 conductors), equipped with a 63A plug (CEE, 3P + N +E).
 - The 4-pole 30 mA residual current circuit breaker protects against electrical shock.
- Precision digital voltmeters (3 digits) per phase.
- Precision digital ammeters (3 digits) per phase.
- Built to meet the highest European and international safety requirements.
- The internal wiring is larger than normal to increase reliability.
- Extremely robust 19" / 3U metal case.
- 16A blue power outlets for France and Belgium
