2.4 GHz and DMX wall controller - 4 zones - White/CCT

The PILOTctl-4×2 wall-mounted controller is a touch-sensitive control interface specially designed for monochrome or CCT LED ribbon installations. The control signal is transmitted wirelessly in 2.4GHz mode to the driver, and a wired DMX output is also available for connecting drivers or other DMX products. The rear connection block is compatible with the standard format of Legrand back boxes. In conjunction with the TAPEDRIVER-RF4 BLE, the PILOTctl-4x2 allows easy dimming and control of four zones.

This model is available in white or black finish, offering elegant integration in a variety of environments.
