2.4 GHz wall-mounted DMX controller with 4 RGB and RGBW zones

PILOTctl4x4 wall controllers are touch-sensitive control interfaces. The control signal is transmitted wirelessly in 2.4GHz mode to the driver. A wired DMX output can also be used to connect drivers or other DMX products. The rear connection block is compatible with standard Legrand back boxes.

Combined with the TAPEDRIVER-RF4 BLE, they allow you to control your LED ribbon installations, offering dimming, color adjustment and 4-zone management functions. These controllers are available in white or black finish.

PILOTctl4x4: control of RGB and RGBW LED ribbons.
