## Overview

---

PLTL-1x1: Mobile platform 1m x 1m

### Light platforms.

Compact, lightweight and sturdy. The top of the platform is made of plywood with a non-slip coating.

### Only 1 type of stand: 3 heights available.

Light platforms can be supported by folding stands of different heights (from 20 to 60 cm).

The maximum height allowed is 1 meter with 2 stacked stands\*.

\*In order to stack two brackets, the following accessories must be added: PLTL-Clip and PLTL-Con

### Features of PLTL-1x1.

\*500 kg/m<sup>2</sup> distributed over the entire platform surface with feet up to 60 cm high

### About security.

In accordance with the NF E85-015 standard:

The maximum height allowed is 1 meter with 2 stacked supports.

A guardrail must be installed if the height to be climbed is greater than 50 cm. These provisions are not exhaustive. For other requirements, please refer to the standard mentioned above.

### Pay attention to floor capacity:

Light series platform supports must have a perfectly flat bearing surface. It is necessary that each plastic foot be in firm contact with the ground.

As a result, this platform cannot be used on loose or uneven ground. Please distribute the loads evenly over the entire platform surface.

### About railings and stairs:

A guardrail must be installed whenever the fall height exceeds 50 cm. A staircase less than or equal to 120 cm wide must have at least one handrail.

### Fire resistance.

Fire resistance class: Bfl-S1 (corresponds to French class M1). It complies with the European standard EN13501-1+A1:2010.
