### About security

[/vc\_column\_text][vc\_empty\_space height="60px"][vc\_column\_text]**In accordance with the NF E85-015 standard:**

- A maximum height of 150 cm is allowed
  - A guardrail must be installed if the height to be climbed is greater than 50 cm.
- These provisions are not exhaustive. For other requirements, please refer to the standard mentioned above.

### Attention to soil capacity:

A loose floor can affect the safety of the installation.  
Please distribute the loads evenly over the entire platform surface.

### About railings and stairs:

A guardrail must be installed as soon as the height of fall is higher than 50 cm.  
A staircase less than or equal to 120 cm wide must have at least one handrail.

### Resistance

#### Fire resistance :

Fire resistance class: BFL-S1 (corresponds to the French M1 class).  
It complies with the European standard EN13501-1+A1:2010

#### Resistance Water resistance :

The top is made of birch multi-ply plywood filmed underneath and covered with a non-slip coating on top.  
It is designed to withstand water splashes, so it can withstand the occasional rain.  
It should not be immersed and installed for a long period of time or stored outdoors as it may swell and reduce the load capacity.[/vc\_column\_text][vc\_column\_inner][vc\_row\_inner][vc\_column][vc\_row]
