Interior protection	shaped foam
Color	black
Dimensions	120 × 60 × 35 cm, 50 cm total height (including castors)
Weight	46 kg

Overview

Ten fixtures and their accessories, one flight case.

The PROJECTOR CASE 9 is sized to hold ten BTI-VERSABEAM or ten BTI-SPECTRABLAST fixtures without having to sort through or squeeze in their accessories. A separate dedicated compartment holds truss mounting hooks, cables and all the small parts that travel with the fixtures, so the whole kit leaves in one flight case rather than spread across several.

Built for the road.

Solid 9 mm plywood construction with a durable black HEXA finish, reinforced corners to absorb repeated handling knocks. This flight case delivers optimal protection thanks to its interior foam, specifically shaped to cushion the contents on every trip.

Handling and transport.

Two recessed folding handles on each short side, and two more on each long side: four grip points in total, for flexible one- or two-person carrying depending on the setup. Four 100 mm soft rubber swivel castors with self-aligning wheels, two with brakes for better standstill stability. Secure closure with heavy-duty butterfly latches. A recessed panel on the lid is built for labeling, handy for telling this flight case apart from others of the same size in a stack.

A format built to fit existing logistics.

Standard truck-pack dimensions, 120 × 60 × 35 cm, 50 cm tall overall including castors. This flight case stacks with other cases of the same format, saving space both in transit and in storage.

Key features:

Stackable flight case, built for 10× BTI-VERSABEAM or 10× BTI-SPECTRABLAST units and accessories

Dedicated compartment for mounting hooks, cables and small parts
