1790,00 € inc. VAT

Professional snow machine, controlled by DMX and mounted in a flight case

- The device produces very large quantities of artificial snow that perfectly imitates the snow on stage
- Air volume and fluid flow can be adjusted via DMX to achieve the required snow effects, from light snow to blizzard
- The effect outlet is equipped with a 10 m long air hose and can be easily mounted on a stand or in a deck, using a standard hook
- It can also be attached to the optional PM-1 (120°) horizontal motion motor to cover a larger area with snowflakes
- 20 liter fluid tank and 10 m air hose
- The flight case has an access for the air hose, it can be closed for a quieter operation
- Wireless DMX with **W-DMX-PCBR** module (not included)

Caractéristiques

Brand	Antari
Protocole	DMX, Wireless DMX
Function	Wireless remote control (not included)
