

## SC-08 WHITE

899,00 € inc. VAT

Compact but powerful 8" coaxial speaker - white finish

SKU: B08625

Categories: [Passive speakers](#)

EAN13 : 5420025686259

brand Synq

- The SC-08 is a compact, trapezoidal and very powerful "point source" loudspeaker suitable for a wide range of applications.
- It is equipped with a high quality custom 8" coaxial driver with a neodymium magnet and a 1.45" compression driver (coil: 1").
- The 2-way passive crossover is equipped with the best audio components available to produce a perfectly homogeneous frequency response without phase errors under all circumstances.
- The carefully tuned, resonance-free bass-reflex cabinet is made of premium Baltic birch plywood and covered with scratch-resistant textured black polyurea.
- This loudspeaker has a 90° circular dispersion profile with no phase error, allowing it to be quickly and easily adapted to a wide range of applications without the need for additional adjustment.
- For many applications, the maximum SPL of 123dB and the frequency response of 70-20,000Hz are more than sufficient. By adding one or more subwoofers from the SQ series, it is perfectly possible to build a complete sound system that is very powerful but visually unobtrusive.
- The many connection and hanging options make this speaker very attractive to rental companies looking for maximum flexibility:
  - The 4-pole Speakon inputs/outputs, combined with an 8-ohm impedance and the ability to easily switch between Speakon +/-1 and +/-2 connections, allow multiple SC-08s to be connected in series via a single 4-wire speaker cable.
  - The SC-08 mounts on a 35mm speaker stand as standard, but can also be equipped with an optional U-mount bracket.
  - Mounting points are also provided to quickly attach the SC-08 to ALU trusses using standard omega brackets.
  - Thanks to its smart design, the SC-08 is also perfect for use as a compact stage monitor.
- Available as standard in black or white finish.
- Speaker power: 300Waes (recommended amplifier: 600Wrms).
- Four SC-08 speakers with U-brackets and omega brackets can be transported in the optional flight case.

# INFORMATIONS COMPLÉMENTAIRES

Brand	Synq
Power	300 W aes
Impedance	8 Ω
Taille du haut-parleur	8
Function	Mounting 35 mm
SPL max (@1m)	123 dB
Family	SC
Protection class	IP20
