

SCM-1 SCENEMASTER

16-channel DMX controller + MIDI functions

Référence: B04624

299,00 € inc. VAT

- Extremely easy-to-use 16-channel DMX controller for all kinds of applications: stage, DJ, architectural projects, etc.
- Connect up to 4 devices to obtain a virtual controller that can control up to 64 channels and/or scenes!
- Two user modes are available:
 - **Dimmer mode:** in this mode, you can control 16-channel dimmers (expandable to 64 channels);
 - **Scene mode:** in this mode, 16 scenes can be created, each involving 16 channels (expandable to 64 scenes, each involving 64 channels).
- MIDI functions via USB (16 channels) :
 - **MIDI OUT :** all sliders and flash buttons of the channels are able to send MIDI commands, so that the user can control different MIDI applications (e.g. Arkaos, Resolume, DMX-Creator, Daslight, ...);
 - **MIDI IN :** all scenes (from 16 to a maximum of 64) can be controlled by any MIDI controller (wireless integration with MIDI software like Cubase, etc ...), a perfect concept for musicians, etc ...
- The channel sliders can be used to mix scenes together.
- Presence of push buttons above each dimmer channel:
 - **Dimmer mode:** these buttons are used as flash buttons;
 - **Scene mode:** Scenes can be easily switched on or off.
- Blackout function.
- The last output configuration is memorized, even when the device is turned off and on again: there is no need to push any button or disable the blackout mode: perfect for exhibition stands, stores, etc...
- A 4-character LED display shows the DMX values (0-255 or 0%-100%), as well as the MIDI values (0-127).
