TOOLS FOR TRUSSING

STACK290B

Part no. H11810 EAN 3662009028866

Proper protection, properly thought through.

Stacking spacer for 290 mm aluminium box truss systems. The STACK290B keeps stacked aluminium structures safe and properly organised, holding 2, 3 and 4-point trussing in the 290 mm format at a steady, even distance from one another. Built to protect your stock through every stage of storage and transport, it's fast becoming an essential fixture in any well-run truss inventory.

Technical specifications

Colour	**Black**
Format	**290, 290**
Length	**60 cm, 60 cm**
Net weight	**0.52 kg**

Overview

Proper protection, properly thought through.

Keep every section of truss clear of the next and you keep it free of scratches, dents and the slow wear that comes from metal grinding against metal. The STACK290B does exactly that, holding each piece at a consistent distance and preserving both the look and the resale value of kit that's often destined for rental fleets and high-end event work, where appearances matter as much as function.

Built to fit your whole inventory.

The STACK290B takes any truss length in the 290 mm format, whatever the point configuration — 2, 3 or 4. It sits comfortably with the ConteStage QUA29, QUATRO29, PT29 and DUO29 ranges, giving you one spacer to organise an entire fleet rather than a different part number for every variant in the warehouse.

Engineered to last.

Moulded from glass-fibre reinforced technical plastic, the STACK290B strikes that rare balance between strength and weight. It's built for the long haul — repeated loading, daily handling on site, and the kind of permanent storage use that would see lesser materials give up long before their time.

Storage made properly simple.

There's a particular satisfaction in a well-stacked truss pile, and the STACK290B gets you there without any fuss. Slot it between each section and the stack falls into line on its own — tidy, level, and ready to be counted, moved or loaded without a second thought. One small piece of kit, one rather better-organised warehouse.
