Color	**black**

Overview

TOT-HEAD BLK - Black top for aluminum frame with hanging bar.

Elegantly finish off your vertical structures or create hanging points with this aluminum top designed for QUA series square structures and totem poles. Its tapered shape (triangular on two sides, rectangular on the other two) incorporates a 308 mm hanging bar (Ø 50 mm tube) for mounting spotlights, audio equipment or scenic accessories.

Made entirely of aluminum (2 mm thick), this top offers the same load-bearing capacity as the QUA series structure, while remaining light and unobtrusive. Its versatile design allows it to be mounted in any direction: use it as an elegant structure termination (vertical, horizontal) while retaining the possibility of attaching spotlights or accessories to its hanging bar. Also suitable for floor mounting on QUA plate to create a stand-alone support.

A lightweight, more resistant alternative to the steel SUP-290, TOT-HEAD fits perfectly into exhibition stands, trade shows, concerts, museum installations or events where aluminum aesthetics are preferred. Supplied with connecting sleeves for fast, secure assembly.
