

## TotelW

Telescopic totem from 1 m to 1.8 m + Spandex + Covers - White

Référence: H11130

**429,00 € inc. VAT**

### **Telescopic totem**

This totem allows you to easily position your speakers or your light shows.

Thanks to the cable passages in the bases, the power, DMX or audio cords disappear for a more aesthetic look.

Its adjustable height makes it possible to adapt to many different situations.

### **Ultra resistant**

The totem pole is made of very strong steel, so the telescopic tubes will withstand permanent assembly and disassembly.

The assembly is done without tools thanks to 8 clamping wheels that fix the bases to the tubes.

### **Delivered with the covers**

The totem comes with a white lycra fabric and two nylon covers to carry the legs and bases.

### **European manufacturing**

The Contestage line includes a wide range of systems for small events as well as large productions.

All Contestage products are designed and manufactured in Europe according to a strict philosophy that emphasizes simplicity, standardization, ease of use, configuration flexibility and of course absolute safety.
