Technical specifications

Brand	**Audiophony**
Compatible with	**UHF410-Ant**
Threaded adapter	**5/8″ female**
Dimensions	**125 × 110 × 50 mm**

Overview

Mounting the UHF410-Ant off a mic stand.

The UHF410-Ant-Hold pairs with the UHF410-Ant for installs where a standard mic stand isn't the right fit: wall mounting, truss mounting, or any fixed installation where the antenna needs to stay put long-term. Its 5/8″ female threaded adapter screws straight onto the antenna's 5/8″ mount, no extra hardware needed. Its two female BNC sockets also let it work as a junction between two male connectors, for example to connect a UHF410-Rall1m or UHF410-Rall10m extension cable to the antenna's male connector.

Key features:

Dedicated mounting bracket for the UHF410-Ant

5/8″ female threaded adapter

Doubles as a female-to-female junction for male BNC connectors

No additional hardware required
